Re: DMR-190037; Exxon Mobil Corporation; Control #: N-10009; Subsea Wells F, A, B, C, D,
and E

Dear Ms. Wilson:

The Department of Marine Resources in cooperation with other state agencies is responsible under the Mississippi Coastal Program (MCP) for managing the coastal resources of Mississippi. Proposed activities in the coastal area are reviewed to insure that the activities are in compliance with the MCP.

The Department has completed review of the above-referenced project under the Coastal Zone Management Act of 1972 and the Coastal Zone Reauthorization Amendments of 1990 and as the lead Coastal Program Agency for the State of Mississippi pursuant to 16 U.S.C. Section 1456(c) and Mississippi Code § 57-15-5, concurs with Exxon Mobil Corporation's consistency certification for this project.

Attached you will find a copy of comments from the Mississippi Department of Archives and History concerning the potential relocation of staging areas to Mississippi and environmental response and remediation.

The above granted consistency certification was based upon the plan presented. If you have any questions regarding this letter, please contact Kristyn McGuire with the Bureau of Wetlands Permitting at (228) 523-4033 or kristyn.mcguire@dmr.ms.gov.

Sincerely,

Joe Spraggins
Executive Director
Mississippi Department of Marine Resources
