

United States Department of the Interior

BUREAU OF OCEAN ENERGY MANAGEMENT

Gulf of Mexico OCS Region 1201 Elmwood Park Boulevard New Orleans, LA 70123-2394

In Reply Refer To: GM 235D May 3, 2021

Ms. Tracy Albert Shell Offshore Inc. One Shell Square P.O. Box 61933 New Orleans, Louisiana 70161-1933

Dear Ms. Albert

Reference is made to the following plan:

Control No. S-8020

Type Supplemental Development Operations Coordination Document

Received August 20, 2020, amended September 2, September 3, October 7, and October 27,

2020, and March 4, 2021

Lease(s) OCS-G 19939, Block 348, Mississippi Canyon Area (MC)

OCS-G 26252, Block 391, Mississippi Canyon Area (MC) OCS-G 26253, Block 392, Mississippi Canyon Area (MC) OCS-G 26254, Block 393, Mississippi Canyon Area (MC)

RUE OCS-G 30380, Block 437, Mississippi Canyon Area (MC)

The Minerals Management Service, Mississippi Canyon Block 392 Unit Agreement Number is 754312009, and the Mississippi Canyon Block 393 Unit Agreement Number is 754314008.

You are hereby notified that the approval of the subject plan has been granted as of May 3, 2021, in accordance with 30 CFR 550.270(b)(1).

In accordance with 30 CFR 556.901(d), additional security may be required for your proposed activities. Prior to conducting activities in which you need to obtain approvals and/or permits described in 30 CFR 550.281(a) from the appropriate District Manager or BSEE Regional Supervisor, you must contact BOEM Risk Management Operations Group by email at boemrmog@boem.gov to determine if additional security is required and comply with any demand for this security.

Our review indicates that there is a pipeline in the vicinity of Wells and Platform Appomattox that may pose a hazard to your proposed operations. Therefore, take precautions in accordance with Notice to Lessees and Operators No. 2008-G05, Section VI.B, prior to performing operations.

This approval includes the activities proposed for Platform A-Appomattox (Complex ID 2623), Drill Centers AC, AE, AW, IE, IW, and VX, and the below listed wells.

Well	Area and Block	Lease No.
AW001	MC 391	OCS-G 26252

You must comply with the following species protective measures in all activities conducted pursuant to the plan:

- COMPLIANCE WITH BIOLOGICAL OPINION TERMS AND CONDITIONS AND REASONABLE AND PRUDENT MEASURES: This approval is conditioned upon compliance with the Reasonable and Prudent Measures and implementing Terms and Conditions of the Biological Opinion issued by the National Marine Fisheries Service (NMFS) on March 13, 2020. This includes mitigation, particularly any appendices to Terms and Conditions applicable to the plan, as well as record-keeping and reporting sufficient to allow BOEM and BSEE to comply with reporting and monitoring requirements under the Biological Opinion; and any additional reporting required by BOEM or BSEE developed as a result of Biological Opinion implementation. The NMFS Biological Opinion may be found here:

 https://www.fisheries.noaa.gov/resource/document/biological-opinion-federally-regulated-oil-and-gas-program-activities-gulf-mexico. The Appendices and protocols
 - https://www.fisheries.noaa.gov/resource/document/biological-opinion-federally-regulated-oil-and-gas-program-activities-gulf-mexico. The Appendices and protocols may be found here: https://www.fisheries.noaa.gov/resource/document/appendices-biological-opinion-federally-regulated-oil-and-gas-program-gulf-mexico.
- SUPPORT BASES AND VESSEL TRANSIT ROUTES: Approval of your plan is
 conditioned upon your use of the support bases and vessel transit routes as described in
 your plan. BOEM/BSEE must be notified at least 15 days prior to any vessel route
 changes that require transit of the Bryde's Whale area, and you must receive prior
 approval for that transit from BOEM/BSEE
- SEISMIC SURVEY OPERATION, MONITORING, AND REPORTING GUIDELINES: The applicant will follow the guidance provided under Appendix A: Seismic Survey Mitigation and Protected Species Observer Protocols found in the Biological Opinion issued by the National Marine Fisheries Service on March 13, 2020. The guidance can be accessed on NOAA Fisheries internet website at https://www.fisheries.noaa.gov/resource/document/appendices-biological-opinion-federally-regulated-oil-and-gas-program-gulf-mexico.
- MARINE TRASH AND DEBRIS AWARENESS AND ELIMINATION: The applicant will follow the guidance provided under Appendix B. Gulf of Mexico Marine Trash and Debris Awareness and Elimination Survey Protocols found in the Biological Opinion issued by the National Marine Fisheries Service on March 13, 2020. The guidance can be accessed on NOAA Fisheries internet website at https://www.fisheries.noaa.gov/resource/document/appendices-biological-opinion-federally-regulated-oil-and-gas-program-gulf-mexico.
- VESSEL-STRIKE AVOIDANCE/REPORTING: The applicant will follow the
 guidance provided under Appendix C. Gulf of Mexico Vessel Strike Avoidance and
 Injured/Dead Aquatic Protected Species Reporting Protocols found in the Biological
 Opinion issued by the National Marine Fisheries Service on March 13, 2020. The
 guidance can be accessed on the NOAA Fisheries internet site at
 https://www.fisheries.noaa.gov/resource/document/appendices-biological-opinion-federally-regulated-oil-and-gas-program-gulf-mexico.
- **SEA TURTLE RESUSCITATION GUIDELINES**: The applicant will follow the guidance provided under Appendix J. Sea Turtle Handling and Resuscitation Guidelines found in the Biological Opinion issued by the National Marine Fisheries Service on March 13, 2020. The guidance can be accessed on the NOAA Fisheries internet site at https://www.fisheries.noaa.gov/resource/document/appendices-biological-opinion-federally-regulated-oil-and-gas-program-gulf-mexico.

MOON POOL MONITORING AND REPORTING: A moon pool has been
identified during review of your plan submittal. If any sea turtle, other marine mammal,
or Endangered Species Act (ESA) listed species is detected, you are required to contact
NMFS at nmfs.psoreview@noaa.gov and BSEE at protectedspecies@bsee.gov for
additional guidance and incidental report information.

In addition to the measures proposed above and in your plan, the following additional measures are require after consultation with NMFS to ensure compliance with the Biological Opinion:

General Requirements

- Use of a moon pool requires regular monitoring while open to the water column
 and if a vessel is not underway. Regular monitoring means 24-hour video
 monitoring with hourly recurring checks for at least five minutes of the video
 feed, or hourly recurring visual checks of the moon pool for at least five minutes
 by a dedicated crew observer with no other tasks during that short visual check.
- If water conditions are such that observers are unable to see within a meter of the surface, operations requiring the lowering or retrieval of equipment through the moon pool must be conducted at a rate that will minimize potential harm to protected species.
- Moon pools with hull doors should attempt to keep doors closed when no activity
 is occurring within the moon pool, unless the safety of crew or vessel require
 otherwise. This will prevent protected species from entering the confined area
 during periods of non-activity.

Movement of the Vessel (without closed hull door) and Equipment Deployment/Retrieval

- Prior to movement of the vessel and/or deployment/retrieval of equipment, the
 moon pool must be monitored continuously for a minimum of 30 minutes, by a
 dedicated crew observer with no other tasks, to ensure no individual protected
 species is present in the moon pool area.
- If a protected species is observed in the moon pool prior to movement of the vessel, the vessel must not be moved and equipment must not be deployed or retrieved, to the extent practicable. If the observed animal leaves the moon pool, the operator may commence activities. If the observed animal remains in the moon pool, contact BSEE prior to planned movement of the vessel according to reporting requirements (see below under Reporting of Observations of Protected Species within an Enclosed Moon Pool).
- Should a protected species be observed in a moon pool prior to activity commencement (including lowering or retrieval of equipment), recovery of the animal or other actions specific to the scenario may be required to prevent interaction with the animal. Operators must not take such action except at the direction of, and after contact with, NMFS.
- SLACK-LINE PRECAUTIONS AND REPORTING REQUIREMENT: If operations require the use of flexible, small diameter (< 2 inch) lines to support

operations (with or without divers), operators/contractors must reduce the slack in the lines to prevent accidental entanglement of ESA listed species. The following measures are required (noting that diver safety is paramount, and the following measures should be followed only in cases where they do not jeopardize human safety):

- Operators must utilize tensioning tools and/or other appropriate procedures to reduce unnecessary looseness in the lines and/or potential looping.
- The lines must remain taut, as long as additional safety risks are not created by this action.
- A line tender must be present at all times during dive operations and must monitor the line(s) the entire time a diver is in the water.
- Should the line tender and/or diver become aware of any ESA listed species entanglement, the following protocols must be followed as soon as safety permits.

Should an ESA listed species interaction resulting in entanglement, entrapment and/or injury occur, the interaction must be reported immediately or after diver safety (if present) is ensured.

• REPORTING REQUIREMENTS FOR MOON POOL AND SLACK-LINE ENTANGLEMENT:

Review of your proposed activities identified potential entanglement and/or entrapment risk(s) to protected species (i.e., species protected under the ESA and/or Marine Mammal Protection Act). Procedures and measures for reporting are dependent upon the situation and must be followed only in cases where they do not jeopardize human safety. These general requirements replace those specific to dead and injured species reporting in respective sections of Appendix A as they relate to geophysical surveys and Appendix C of the 2020 Biological Opinion on the Bureau of Ocean Energy Management's Oil and Gas Program Activities in the Gulf of Mexico.

Incidents Requiring Immediate Reporting

Should any of the following occur at any time, **immediate reporting** of the incident is required after personnel and/or diver safety is ensured:

- Entanglement or entrapment of a protected species (i.e., an animal is entangled in a line or cannot or does not leave a moon pool of its own volition).
- Injury of a protected species (e.g., the animal appears injured or lethargic).
- Interaction, or contact with equipment by a protected species.
- Any observation of a leatherback sea turtle within a moon pool (regardless of whether it appears injured, or an interaction with equipment or entanglement/entrapment is observed).

As soon as personnel and/or diver safety is ensured, report the incident to NMFS by contacting the appropriate expert for 24-hr response, until contact is made. Contact information for reporting is as follows:

- **Marine mammals**: contact Southeast Region's Marine Mammal Stranding Hotline at (877) 433-8299.
- **Sea turtles**: contact Brian Stacy, Veterinary Medical Officer at (352) 283-3370. If unable to reach Brian Stacy, contact Lyndsey Howell at (301) 301-3061. This includes the immediate reporting of any observation of a leatherback sea turtle within a moon pool.
- Other protected species (e.g., giant manta ray, oceanic whitetip shark, or Gulf sturgeon): contact the ESA Section 7 biologist at (301) 427-8413 (nmfs.psoreview@noaa.gov) and report all incidents to takereport.nmfsser@noaa.gov.

Minimum reporting information is described below:

- 1. Time, date, water depth, and location (latitude/longitude) of the first discovery of the animal;
- 2. Name, type, and call sign of the vessel in which the event occurred;
- 3. Equipment being utilized at time of observation;
- 4. Species identification (if known) or description of the animal involved;
- 5. Approximate size of animal;
- 6. Condition of the animal during the event and any observed injury / behavior;
- 7. Photographs or video footage of the animal, only if able; and
- 8. General narrative and timeline describing the events that took place.

After the appropriate contact(s) have been made for guidance/assistance, you may contact BSEE at protectedspecies@bsee.gov (24 hours/day) for questions or additional guidance on recovery assistance needs (if still required) and continued monitoring requirements. Minimum post-incident reporting includes all information described above (1 through 8) in addition to the following:

- 1. NMFS liaison or stranding hotline that was contacted for assistance;
- 2. For moon pool observations or interactions:
- 3. Size and location of moon pool within vessel (e.g., hull door or no hull door);
- 4. Whether activities in the moon pool were halted or changed upon observation of the animal; and
- 5. Whether the animal remains in the pool at the time of the report, or if not, the time/date the animal was last observed.

Reporting of Observations of Protected Species within an Enclosed Moon Pool

If a protected species is observed within an enclosed moon pool and does not demonstrate any signs of distress or injury or an inability to leave the moon pool of its own volition, measures described in this section must be followed (only in cases where they do not jeopardize human safety). Although this particular situation may not require immediate assistance and reporting as described under Incidents Requiring Immediate Reporting (see above), a protected species could potentially become disoriented with their surroundings and may not be able to leave the enclosed moon pool of their own volition. In order for operations requiring use of a moon pool to continue, the following reporting measures must be followed:

Within 24 hours of any observation, and daily after that for as long as an individual protected species remains within a moon pool (i.e., in cases where an ESA listed species has entered a moon pool but entrapment or injury has not been observed), the following information must be reported to BSEE (protectedspecies@bsee.gov):

- 1. For an initial report, all information described above should be included.
- 2. For subsequent daily reports:
 - Describe the animal's status to include external body condition (e.g., note any injuries or noticeable features), behaviors (e.g., floating at surface, chasing fish, diving, lethargic, etc.), and movement (e.g., has the animal left the moon pool and returned on multiple occasions?);
 - Description of current moon pool activities, if the animal is in the moon pool (e.g., drilling, preparation for demobilization, etc.);
 - Description of planned activities in the immediate future related to vessel movement or deployment of equipment;
 - Any additional photographs or video footage of the animal, if possible;
 - Guidance received and followed from NMFS liaison or stranding hotline that was contacted for assistance;
 - Whether activities in the moon pool were halted or changed upon observation of the animal: and
 - Whether the animal remains in the pool at the time of the report, or if not, the time/date the animal was last observed.

These measures are designed to promote environmental protection, consistent environmental policy, compliance with environmental laws, and safety.

If you have any questions or comments concerning this approval, please contact Chiquita Hill at (504)736-2668.

Sincerely,

for Bernadette Thomas Regional Supervisor Office of Leasing and Plans
