RE: Request for Temporary Cessation of Operations for 3-Inch Gas Lift Pipeline Segment No. 18230, Right-of-Way OCS-G 29067, Green Canyon Block 18, Platform A, to Green Canyon Block 60, Subsea Manifold, OCS Federal Waters, Gulf of Mexico, Offshore, Louisiana

Ladies/Gentlemen:

Pursuant to regulations contained in Title 30 CFR 250, Subpart J, Whistler Energy II, LLC (Whistler) hereby submits a request for temporary cessation of operations through October 31, 2019, for 3-inch gas lift pipeline Segment No. 18230, Right-of-Way OCS-G 29067, Green Canyon Block 18, Platform A, to Green Canyon Block 18, Subsea Manifold, OCS Federal Waters, Gulf of Mexico, Offshore, Louisiana.

Segment No. 18230 has been out of service since October 15, 2018 due corrosion on the gas lift pipeline. The 3-inch carbon steel gas-lift pipeline is actually inside the subsea well's umbilical. The line is badly corroded where the gas-lift line exits the umbilical. It is physically located on a small subcellar deck accessible by ladder. Due to its location, Whistler will need to hang scaffolding from the underside of the cellar deck. We have delayed the repair until the summer when the weather will be calmer, as all of the work will take place over the water.

In support of this request, enclosed is a Pay.Gov receipt confirming payment of the associated cost recovery fee of \$4,169 for right-of-way pipeline modification.

Should you have any questions or require any additional information, please contact Mandy Phythian, Regulatory Specialist, at (713) 380-4930 or mandy.phythian@talosenergy.com.

Sincerely,

Whistler Energy II, LLC

Gregory Miller
Chief Executive Officer
